ADVANCED FOD SOLUTIONS FOR THE AERONAUTICAL SECTOR

Whether for manufacturers or maintenance services, safety has always been at the heart of the aeronautical sector and avoiding Foreign Object Debris (FOD) has become one of its unavoidable aspects. The annual financial impact of FODs for the aeronautical industry is estimated to be \$ 13 billion, with indirect costs from FODs up to ten-fold the direct costs resulting when totalling the delays, aircraft substitutes, fuel expenses and unplanned maintenance.

- 65 SPL - Spline 15° angled ratchet ring wrenches

- Spline profile 15° angled ring ratchets for aeronautical fasteners.
- The spline profile applies more torque with less strength as the tightening contact surface is higher.
- The contact points of a Spline wrench are always far from the nut's angles. This limits wear of the nuts.
- The Spline profile ensures high versatility. It is compatible with Spline, Torx, 4-, 6- and 12-point fasteners.
- Recess under the handle allows to pass fingers or an obstacle.
- Reversible compact lever ratchet mechanism.
- 5° increments (6° for sizes 7, 8 and 9).
- Spline sizes: 7 to 36
- Satin chrome finish.

- Spline profile 15° angled long wall offset-ring ratchets for aeronautical fasteners.
- Thin wall and long profile for maximum accessibility.
- Wrenches used in engine assembly and maintenance.
- The spline profile applies more torque with less strength as the tightening contact surface is higher.
- The contact points of a Spline wrench are always far from the nut's angles. This limits wear of the nuts.
- The Spline profile ensures high versatility. It is compatible with Spline, Torx, 4-, 6- and 12-point fasteners.
- Spline sizes: from 7 to 32

SOCKETS 1/4"

SPLINE PROFILE WRENCHES AND SOCKETS

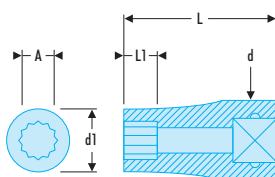

THE SPLINE PROFILE IS SUITED TO SEVERAL TYPES OF PATTERNS

Characteristics and benefits

- SPLINE wrenches and sockets are versatile products more effective than standard wrenches.
- A SPLINE wrench can replace many others as its profile is compatible with many patterns existing in the market.
- The contact points of a SPLINE wrench are always away from the nut angles. This reduces the risk of damaging the nut.
- On damaged nuts, locking is better as the SPLINE profile drives the nut on its flat part.
