

Maximum Efficiency and Proven Protection.

Ships, boats and watercraft of all kinds are subjected to harsh extremes of water, salt, corrosion and weather that aren't encountered by land vehicles.

That's why **Lucas Oil Marine Products** are designed specifically to deliver maximum protection and efficiency in the toughest conditions. **Harbor Breeze Cruises**, based

in Long Beach, California uses Lucas Oil Marine Products throughout its fleet of sightseeing vessels. They have kept extensive records showing that Lucas Products help protect their expensive engines and greatly improve efficiency.

"10% Reduction in Fuel Consumption."

Dan Salas, CEO - Harbor Breeze Cruises

Harbor Breeze Cruises is one of the largest yacht charter and cruise companies operating in the Long Beach and San Pedro Harbors. With such a large fleet, it was imperative to research methods to reduce repair costs, increase efficiency and lower their impact on the environment.

In January 2016, they began using **Lucas Marine Products** exclusively throughout their fleet. Since that time, they have noted that “**Lucas 15W-40 Magnum Diesel Oil** used with **Lucas Heavy Duty Oil Stabilizer** significantly reduces engine noise, reduces engine wear and allows more time between oil changes.”

The company also began testing **Lucas Marine Fuel Treatment**, and found that their vessels “experienced an average of 10% reduction in fuel consumption.” It also helped the engines to run more smoothly and produce less harmful emissions.

**Synthetic Marine Diesel
Engine Oil - 15W-40 Magnum**
Unique Lucas additives protect
engine parts better than any
other oil on the market.

Marine Fuel Treatment
Fights corrosion, keeps fuel lines, carburetors or fuel injectors clean and free of deposits.

Diesel Deep Clean
Keeps particulate filters clean, helping reduce the cost and hassle of maintenance while boosting power and efficiency.
